National Crime Victimization Survey 2005
Full Results in Frequencies

Research Design:

- The aim of the survey was to obtain information regarding Nigerian views on the extent, trend and patterns of criminal victimization in the country.
- The study was conducted in the 36 states of Nigeria and Abuja between October and December 2005.
- The total sample size was 10,036 comprising 51% male and 49% female of 18 years and above.
- The methodology used in the data collection was the in-home, face to face personal interviews, using a stratified multi-stage random selection procedure in order to achieve a national representative sample.
- The field interviews were conducted by Practical Sampling International, a social research company based in Lagos.

Q1. Over the past 12 months, have you personally or has anyone in your household been involved in any dispute including family, marital, work related, commercial or land disputes?
