Summary

The fourth edition of the Police Station Visitors’ Week (PSVW) was organized from 18th to 24th October, 2010 across Africa and around the world. This year a total of Twenty one (21) countries, with more than 35 police organizations, and more than 61 partner organizations participated in the world. Also, One Thousand Two Hundred and Forty Nine (1249) police stations received about 6293 citizens during the visits. Eight African countries participated this year with about Eight Hundred and Fifty-Two visitors (852) participating in the visit in Africa. The gender ratio for this year’s visit in Africa is 55% male and 45% female. This is a marked improvement from the 34% female participation in 2009.

The PSVW promotes accountability, transparency and accessibility of the police by and to the people. It also seeks to inspire improvement by facilitating interaction between the police and the people they police through which common a ground can be identified and challenges adequately addressed through continued dialogue. The overall global nature of the visit also provides governments, police leadership and civil society actors to draw from best practices from around the world and to strengthen police reform initiatives in their domestic jurisdictions.

Like previous visits, the 2010 PSVW was followed using a basic structure and common protocol. The PSVW kit designed by Altus was once more employed to assess local police stations and to evaluate the degree to which they operate to serve the public. The easy-to-use kit encompasses 20 questions that draw information addressing the following categories:

- Community orientation
- Physical conditions
• Equal treatment of the public without bias based on gender, ethnicity, nationality, minority status or sexual orientation
• Transparency and accountability
• Detention conditions

Visitors were in groups of 3 – 5 people, each with its own team leader who coordinated the team’s visit. At the conclusion of each visit, the team leader provided the results to Altus and also submitted a narrative report on their findings, using the special website created for this purpose and sending the original scoring sheets to Altus. Altus assembled the submission of results, audited the scores and through them the pulse of public perception about the police can be easily articulated and recommendations for improvement made.

WHY A GLOBAL EVENT?

The Police provide significant services to the societies within which they operate and the dynamics of these functions change continuously with other changes within the society. To adequately address crime, maintain order and protect human rights and lives, the Police have to continually re-invent itself, by appraising its policies, adopting newer and better strategies of engagement and reviewing the performance of its personnel to ensure that they deliver policing services in an effective, professional and accountable manner.

Many police agencies around the world are currently in a state of reform aiming to enhance professionalism and accountability. One important aspect of the Police Station Visitors’ Week is that police organizations that opened their doors during the Visit have demonstrated a commitment to community relations, transparency and public service which is the foundation of excellent services.

The Police Station Visitors’ Week, now in its fourth run as a global event, seeks to assess police conduct, through a common and basic protocol employed
by ordinary citizens, in other to enhance its accountability to the civilian populace they serve. Since 2006 the number of visitors globally has increased by 61% as at 2009, while participating stations have grown almost as much as 55.19%.

Like previous editions, the visits in 2010 were guided by a single standardized Visitor’s Kit, designed by Altus and consisted of 20 questions tailored to elicit information and score the various police stations visited along the following 5 categories:

- Community Orientation
- Physical Condition
- Equal Treatment
- Transparency and Accountability
- Detention Condition

Most people have preconceived impressions about the Police, irrespective of whether they have actually visited a police station or not. The Police Stations Visitors’ Week provides an opportunity for a cross section of ordinary citizens to visit, interact with and assess Police personnel within their communities. The Altus Visitors’ kit, allows these people to develop informed and objective opinions about the Police and also evaluate their delivery and performance of their policing functions.

By accessing and assessing local Police stations using the Visitors’ kit, both the people and the Police benefit in a number of ways. First, it strengthens accountability of the Police to the public and this can serve to motivate them to better behaviours. Second, it facilitates dialogue between the police and the people which enhances good information sharing and promotes better understanding amongst them. Third, it inspires improvement at the participating stations through repeated visits, monitoring of specific challenges previously highlighted.
The Police as an institution can also employ the opportunity of the visits to demystify its functions and break the usual wall between it and the people. It also serves as an opportunity to share the challenges of the institution hindering the effective discharge of its policing functions.

By and large, the Police face similar challenges across the world and majority need to connect with the people they serve in a transparent, open and accountable manner to be effective. This global event was designed to indentify good practices carried out in police stations on every continent, serving a wide variety of communities. Police service, governments and civil society organizations can use the results to strengthen ongoing reform initiatives, or break new grounds in police reforms.

They can also use it to identify and develop effective model police stations with good working practices which can serve as an example for others.
WHICH POLICE STATIONS PARTICIPATED?

In Africa, police stations in eight countries participated in the 2010 Police Station Visitors’ Week. A minimum of ten police stations were visited in each of the participating countries. Nigeria has the highest number of participating police station while Liberia has the lowest. Below is a table showing participating countries in Africa and their police stations.

WHO WERE THE VISITORS?

Eight hundred and fifty-two (852) visitors participated in the visit in Africa: 55% male and 45% female.

The increase in number of female visitors from 34% in 2009 to 45% in 2010 represents a sharp increase in women participation in police station visitor's week. Increase in the participation of women is important because they form part of existing vulnerable group in Africa. Most societies in Africa are patriarchal, there are structures and practices in the society that make women feel that they are second rated citizens. In relation to police services, most police organizations in Africa have proactive strategies that are targeted at providing services and protecting women. A key example is in the area of services that are focused on gender based crimes. A typical example includes services for victims of rape. In police organizations that have these specific services they are not evenly spread across the countries.

Although visitors whose ages fell below 20 years were just 5%, 41% of the total number of visitors in Africa was within the ages of 20 to 30 years of age. There was minimal participation from participants of ages above 50 with participation at 7%.
Forty eight percent (48%) of the total visitors in the police station visitors’ week were at least university graduates. On the lower side, it was those with elementary school certificate that had the lowest participation of all the visitors in Africa with just 2%. 

![Age Distribution Chart]

![Education Distribution Chart]
Categorization of Visitors
The categories of visitors that took part in the 2010 police station visitors’ week in Africa have been pictographically represented in the chart above. Drawing from the analysis on the chart, students were the highest number of visitors in Africa with 24% out of more than twelve different categories of professions that were involved in the visit. Participants from charity/NGOs/social workers and religious bodies had 17% while those whose group fell among others came lowest with 0.7%.

HOW ARE THE SCORES COLLECTED AND CALCULATED?

The form used during the Police Stations Visitors Week was based on the Likert Scale, in which the possible answers vary from 1 to 5. The scores for each answer are the following:

1 – Totally inadequate (20 points)
2 – Inadequate (40 points)
3 – Adequate (60 points)
4 – More than adequate (80 points)
5 – Excellent (100 points)
The questions were classified according to a scoring scale which was based on the calculation of percentiles 20, 40, 60 and 80 (resulting in 36, 52, 68 and 84, respectively) in a distribution of possible average scores varying from 20 to 100. As a result, the classification categories are:

<table>
<thead>
<tr>
<th>Average score</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 84</td>
<td>Excellent</td>
</tr>
<tr>
<td>Over 68 until 84</td>
<td>More than adequate</td>
</tr>
<tr>
<td>Over 52 until 68</td>
<td>Adequate</td>
</tr>
<tr>
<td>Over 36 until 52</td>
<td>Inadequate</td>
</tr>
<tr>
<td>Until 36</td>
<td>Totally inadequate</td>
</tr>
</tbody>
</table>

Finally, the average score in each observation area is the simple average of the four questions. The final score is the simple average of the five areas.

**WHICH POLICE STATIONS SCORED THE HIGHEST?**

Participating police stations were assessed using indicators that are essentials of what makes a good police station. Below are the assessments of the top ten participating police stations in each indicator area.

**Community Orientation:** Police Stations ought to facilitate interactions with members of the public who seek their assistance or wish to report a crime. Where community members feel comfortable when visiting their police stations they are likely to be more willing to work together with the police on crime prevention programs.
The top three participating police stations as indicated in the diagram above are:

1. Housing Bodija Police Station, Nigeria (100%)
2. Seme Police Station, Nigeria (98.3%)
3. Badagry Police Station, Nigeria (96.7%)

**Physical conditions**: the facilities, spaces and equipment available to the police also reveal the quality of the relation with the public. Police station buildings range from grand to humble structures, but the size and expense of the buildings does not necessarily affect the **order and cleanliness of the station**. The assessments of the visitors were based on the state of good repairs of the stations, adequate furniture and equipment. Disorganised and dirty police stations seemed hostile towards the public; as if the police stations were not public institutions.
The top three participating police stations on physical conditions in Africa are:

1. Ilupeju Police Station, Nigeria (96.7%)
2. Seme Police Station, Nigeria (91.7%)
3. Nima Police Station, Ghana (88.3%)
4. Osu Police Station, Ghana (88.3%)

**Equal Treatment of the Public:** The police are expected to demonstrate their commitment to equal treatment of the public by their sensitivity to vulnerable groups. It is advisable that police personnel should be representatives of the communities they serve in terms of gender, ethnicity, religion and minority groups. Additionally, stations should provide specific services including translation services; services such as women’s desks and braille services for the blind. Police stations in Africa are still lagging behind in terms of provision of these services and having policies that allow for staffing of personnel based on vulnerable group indicators.
The ratings for top 3 police stations for Equal treatment of the public:

1. Badagry Police Station, Nigeria (100%)
2. Housing Bodija Police Station, Nigeria (100%)
3. Seme Police Station, Nigeria (100%)
4. Nima Police Station, Ghana (86.7%)
5. Ilupeju Police Station, Nigeria (81.7%)

Transparency and Accountability: these are quite new ideas to the police and to the communities they serve, in most countries. Anyone walking in to a police station should find it easy to obtain information on the measures of police performance including results of community satisfaction surveys as well as the crime trends on the area of the police station. Identification of police officers in the police stations is very essential as well as clearly informing members of the public about how to file a complaint against police officers presenting alleged misbehavior but also about how to commend police officers for excellent service. This information should also inform the public about civilian oversight bodies present, if they exist.
Ratings of top 3 participating police station according to Transparency and Accountability

1. Housing Bodija police station Nigeria (100.0%)
2. Seme Police Station, Nigeria (96.7%)
3. Badagry Police Station, Nigeria (95.0%)

Detention conditions: although police custody is usually of short duration, in a good police station the conditions of detention must satisfy certain global standards: the right to inform a close relative or third party of one’s arrest, access to a lawyer, a “reasonable” cell size (not overcrowded; adequate lighting and ventilation; equipment for rest (bed, mattress and blankets); accessible toilet under decent, clean conditions; provision of food, including one full meal everyday. Good police detention conditions in terms of catering, hygiene and sanitation should match with local norms. Clean, well lit and livable conditions are fundamental for everyone including detainees.
Ratings of top 3 participating police station in the area of Detention condition
1. Housing Bodija Police Station, Nigeria (93.3%)
2. Seme Police Station, Nigeria (93.3%)
3. Nima Police Station, Ghana (90.0%)
4. Osu Police Station, Ghana (90.0%)
5. Badagry Police Station, Nigeria (86.7%)

Overall assessment of a good police station are as follows:
1. A good police station is oriented to the community.
2. Remarkable police stations present adequate physical conditions;
3. The station personnel has to know its public and treat it equally by providing trained staff and sources of information to attend to different community diversity
4. Accountability and transparency are two core aspects of a good police station.
5. A good station respects detainees’ rights and provides good detention conditions
In view of the above, the pictographical representation below demonstrate the overall observation areas indicating the top 3 police stations in Africa;

1. Seme Police Station, Lagos, Nigeria (96.0%)
2. Housing Police Station, Lagos, Nigeria (93.7%)
3. Badagry Police Station, Lagos, Nigeria (92.3%)
4. Nima Police Station, Accra, Ghana (88.0%)
5. Osu Police Station, Accra, Ghana (85.0%)
6. Ilupeju Police Station, Lagos, Nigeria (83.7%)
7. Ikoyi Police Station, Lagos, Nigeria (76.7%)
8. A division Police Station, Uyo, Akwa Ibom, Nigeria (75.0%)
9. Bo Eastern Police Station, Freetown, Sierra Leone (74%)
10. Apapa Police Station, Lagos, Nigeria (73.7%)
SUMMARY OF PERFORMANCE OF PARTICIPATING POLICE STATIONS ON COUNTRY WISE BASIS

The following charts show the top police station in each indicator area in each country.

1. Community Orientation

![Chart showing Police Station Scores: Community Orientation by Countries]

Ratings of top 3 police stations on community orientation:
1. Housing Bodija police station, Nigeria (100.0%)
2. Nima police station, Ghana (91.7%)
3. Commissariat de Dantokpa, Benin (88.3%)
2. Physical Conditions

- Ilupeju police station, Nigeria (96.7%)
- Osu police station, Ghana (88.3%)
- Bo Eastern police station, Sierra Leone (73.3%)

Ratings of top 3 police stations on physical conditions:
1. Ilupeju police station, Nigeria (96.7%)
2. Osu police station, Ghana (88.3%)
3. Bo Eastern police station, Sierra Leone (73.3%)
3. Equal Treatment of Public

The top 3 rankings for equal treatment are as follows:
1. Seme Police Station, Nigeria (100%)
2. Nima Police Station, Ghana (86.7%)
3. Mayomba Police Station, Sierra Leone (70%)
4. Transparency and Accountability

Top ranking in each country are as follows:

1. Housing Bodija Police Station, Nigeria (100%)
2. Nima Police Station, Ghana (83.3%)
3. Harbour Police Station, Sierra Leone (78.3%)
5. Detention Conditions

Top ranking police stations in each country for detention conditions:

1. Seme Police Station, Nigeria (93.3%)
2. Osu Police Station, Ghana (90.0%)
3. Bo Eastern Police Station, Sierra Leone (81.7%)
4. Buea Town Police Station, Cameroon (68.3%)
5. Commissariat de Fifadiji, Benin (68.3%)
6. Johnsville Police Station, Liberia (68%)
7. Kibuye Police Station, Uganda (51.3%)
8. Kamukunji Police Station, Kenya (40%)
5. Overall assessment top participating police station in each country

Top participating police station in each participating country in Africa:
1. Seme Police Station, Nigeria (96.0%)
2. Nima Police Station, Ghana (88.0%)
3. Bo Eastern Police Station, Sierra Leone (74%)
4. Gendarmerie D’Abomey-Calavi, Benin (68%)
5. Johnsville Police Station, Liberia (64%)
6. Buea Town Police Station, Cameroon (61.7%)
7. Kiira Road Police Station, Uganda (56%)
8. Kamukunji Police Station, Kenya (45.3%)
The following is a chart illustration of the performance of the participating countries in each indicator area indicted the national average of all the participating countries in each indicator area:

Community Orientation:
1. Sierra Leone – 64.8%
2. Ghana – 63.4%
3. Cameroon – 57.4%
4. Liberia – 57.0%
5. Nigeria – 54.6%
6. Uganda – 53.8%
7. Benin – 53.3%
8. Kenya – 53.0%
Physical conditions:
1. Ghana – 51.3%
2. Sierra Leone – 50.8%
3. Liberia – 47.9%
4. Kenya – 44.6%
5. Cameroon – 44.6%
6. Nigeria – 44.4%
7. Uganda – 40.6%
8. Benin – 39.6%
Equal treatment of the public:
1. Sierra Leone – 48.4%
2. Liberia – 44.85
3. Ghana – 44.0%
4. Cameroon – 40.5%
5. Nigeria – 39.9%
6. Uganda – 35.9%
7. Benin – 34.5%
8. Kenya – 29.8%
Transparency and Accountability:
1. Ghana – 56.5%
2. Sierra Leone – 53.9%
3. Nigeria – 51.5%
4. Liberia – 51.5%
5. Cameroon – 46.1%
6. Uganda – 45.0%
7. Kenya – 42.3%
8. Benin – 41.8%
The countries are rated as follows according to detention conditions:

1. Sierra Leone
2. Ghana
3. Liberia
4. Benin
5. Nigeria
6. Cameroon
7. Uganda
8. Kenya
The overall assessment of the countries is illustrated below:

1. Sierra Leone – 53.9%
2. Ghana – 52.7%
3. Liberia – 49.6%
4. Nigeria – 49.6%
5. Cameroon – 46.4%
6. Benin – 42.8%
7. Uganda – 42.3%
8. Kenya – 40.5%
GOOD PRACTICES/ AREAS OF IMPROVEMENT/ STATION COMMANDERS THAT DESERVE COMMENDATIONS IDENTIFIED BY VISITORS IN THE 2010 PSVW.

Amongst the reasons why PSVW is conducted is for visitors to identify certain good practices that have been evolved by police stations in their local communities and probably identify the impact of those good practices in the service delivery being generated by the police to member of the public. The visitors were also required to identify improvement areas which the police has design to ensure effective services to the public. The visitors are also required to note down if any exist, DPOs’ that deserve commendations who have being able to distinguish themselves from others in terms of performance and innovation.

Benin

Good practices

- Religious fairness: there is equal religious tolerance in the station. The visitors found this very fascinating.
- Relationship with community: the cordial relationship between some police stations and their host communities speaks for the successes recorded in those communities in crime prevention. The effort no doubt underscores the indispensible role of community policing in any society like ours.
- Media coverage of arrest: inviting and allowing the media to cover arrest speaks openness and fairness in the discharge of their constitutional responsibilities which is commendable.

Areas of Commendation

- In Commissariate de Kouhounou police station, the station has improved commendably. The station has been able to enter into an agreement with two NGOs (EMPOWERED project and WILDAF) in order to fight against assault on women, sexual harassment, child abuse, violence against the disable and the aged.
Station Commanders deserving recommendations

- The Station Commander at Commissariat FIDJROSSE personally furnished his office and installed computer in it for quality service delivery of the station to the citizenry and keeping inventories in the station. He uses his personal money to fuel patrol vehicles. He was also able to establish cooperation among officers and their host community.

What changes would the visitors like?

- Adequate Funding of the police: one criticism of the visitors focused on the poor funding of the police which most times have hampered their efficiency and responses to their basic responsibilities in their host community. They therefore called for regular improvement of the funding of the police to enable them discharge their activities effectively.

- Improved working condition of the personnel: the police in Africa have always been working under poor condition in their different countries which has affected their morale to effectively discharge their responsibilities, they therefore called on the government to improve the welfare package of the police and make their work condition more favorable.

- Insufficient staffing of the police stations: in Abomey Calavi, visitors frowned at the insufficient number of personnel who are usually deployed to provide security provisioning to the citizenry. They therefore called on the government to recruit more personnel to meet the security needs of the citizenry in the 21st century.

- Poor customer service: in commissariat d AGLA, visitors could not find any reasonable channel through which the public can effectively communicate to the police in cases of emergence. They called for immediate introduction of customer care desk and the installation of the necessary gadgets in place.

- Outright lack of cell facilities and police equipment: the visitors found it appalling that most police stations do not have necessary facilities that a station of modern standard ought to have. The chairs and tables are practically not there, they are outdated and in a bad shape. Some cannot even boast of a patrol vehicle.
**Cameroon**

**What changes would the visitors like?**

- **Purchase of new furniture:** the visitors suggested the police to embark on police private partnership in order to be able to acquire some of their needed facilities or gadgets. They advised the police to buy new furniture as they found the old ones insulting to the nation.

- **Purchase of office equipments and other necessary materials needed for quality service delivery:** the services of the police as described by the visitors could be enhanced if their work environment is conducive and well equipped with modern facilities for quality service delivery. They call on the government and the police authority to facilitate the purchase of computers, installation of internet facilities, patrol vehicles, communication gadgets, customer care desk, cell facilities renovations. In Idenua, the toilets in the cells are filled already, thereby exposing detainees to health hazards.

- **Openness of the personnel in their dealings:** Muea police station denied the visitors access to some of their detention cells which speaks for itself.

**Ghana**

**Commendations**

- **In Legon,** the visitors were impressed with the facilities they found on ground. The environment was hygienic. The physical environment was enchanting, community orientation was excellent with effective 24hrs customer service and response ready vehicles on ground, the structure is spacious and well ventilated.

- **Openness:** the time the visitors had with the officers were very interesting. The officers were ready to answer their questions and show them whatever they wanted to see. In police stations in Ghana where vehicles were lacking, police officers use their personal money to transport suspects to the station.

**What changes would the visitors like?**

- **There is no regard for language of inmates:** cases have had to last long than it ought to due to no regards for detainee languages. There is the
need for police officers to see every body under detention as fellow citizens instead of treating them as guilty people when they have not been found so.

- There are no toilets in most cells and some as well do not have female cells. This often forces them to resolve to put male and female together whenever the cells are over crowded.
- Some cells do not have a single vehicle for patrol or to response to a distress calls. They often even run out of bullets, leaving arm robbers to operate freely.
- The sizes of most police stations are too small to withstanding the name police station. This therefore leads to poor ventilation and lack of space for offices and other use in the station.
- There were huge files of unresolved cases before the police which ought not to have taken the time it has lasted. There is therefore the need for them to be proactive in resolving such issues instead of allowing them to linger for too longer, thereby making innocent people to suffer and the avoidable inevitable.

Kenya

Good practices

- Embakasi has a well maintained structure, good working relationship with their host community.
- Community orientation: the community that hosts Ongata Reongai has been effectively enlightened on the activities of police and ways they could get across to the police if the need be. There is also a welfare facility for the officers in this area.
- Physical condition: the environment was well sanitized and there are routine for ensuring so.
- Effectiveness: there are 24hrs standby customer service network and patrol vehicles to ensure prompt responses to distress calls or emergences. They ensure regular patrol. The commanding officer can be accessed by any body, thereby giving way for equal treatment.
What changes would the visitors like?

- The need to upgrade facilities: Most of the facilities that were found at some of the police stations visited are outdated and moribund, it is therefore necessary to acquire new facilities to meet modern needs.
- Poor Record Keeping/Data Management: it is unheard off that all the records in most of the police stations visited are still being kept only in hard copies in unsafe places. Police routines are not conspicuously displayed.
- Too much bureaucracy: some of the visitors accused the stations they visited of too much protocols and difficult. They also accused them of harassing hawkers in the street.
- Technological advancement: the visitors called for the need to bring in technological advancement and groundbreaking innovation into policing to help curb the menace of crime prevention and improve on the inefficiency that has pervaded the police for too long.
- Upgrade of police station: there is a unanimous call among visitors for the government to upgrade police stations; most of the structures are old and not modern in their look. They also called for upgrade of cell facilities and provision of phones, light, seats, bed, and blanket among others inside the cells.

**Liberia**

**Good practices**

- In zone seven police station, there were computers on ground for the purpose of record keeping. Case files were kept both in hard and soft copies.
- The physical condition was amazing, according to visitors. The environment was well sanitized natural.
- Community relation: some police stations have been able to design regular meeting with community leaders to ensure ventilation of ideas on crime prevention and response. Some have even taken theirs to media houses like the radio, through this means, people can inquire from the police their necessary questions and get prompt
response. There are also billboards displaying wanted people and other necessary information.

**What changes would the visitors like?**
- Increase female staff: visitors complained about little number of female staffs in the police stations they visited, saying it is not enough. Most of the police stations they visited never had female staffs. They therefore called on the police to recruit more women to be deployed to all police stations to cater for the need of women in detention or as the case may be.
- Some complained that there has not been any significant improvement since the last time they visited

**Nigeria**

**Good practices**
- Customer service desk: although there were few stations without customer service desk, the visitors in their large numbers commended the stations with customer service desk.
- In Ahiazu Mbaise, the police provided medical aids to the detainees who were ill.
- In some police stations like Abaji and Gwagwa, the police were able to device other means of power generation through installation of solar power plate.
- Idupeju police station in Lagos has CCTVs installed while the Asokoro police station in Abuja has one of the finest tied floors in the country. Most of them have installed police communication gadgets, especially in the remote areas.

**What changes would the visitors like?**
- The bulk of the patrol vehicles in the stations are not in good shape. Only few police patrol vehicles could be said to have been in a perfect shape, according to the visitors.
- Poor police welfare has continued to hamper effective performance of officers in the police stations. Their zeal is often affected by this poor welfare and remuneration.
Poor communication network: the communication network put in place by the police authority are ineffective and practically mere cosmetics. They are either not working because of bad battery or they have been crashed by thunder.

It is regrettably appalling that there were police officers who have chosen to be gallant; they turn out to be hunted down by arm bandits because of insufficient arms and ammunitions at their disposal.

The bad and bartered image of police before the public has continue to frustrate their giant strives, there is the need for the police to focus more on integrity and restoration of their image before the public in order to help facilitate inefficiency in their service delivery.

Training: there is the need to ensure effective training of personnel to make them versatile in combating crime in their host communities. The police need to be more professional in their handlings and as such, needs training in different areas like public relations, psychology etc.

There is the urgent need to deploy more women to all police stations nationwide. This will help to ensure gender equality in the discharge of their responsibility and in relation to the public.

The disable in the society need to be consider in the course of building police stations and installation of modern facilities that would help them easily access the services being provided by the personnel.

The structure of most stations is a direct insult on the Nigerian state. The shapes and structures are totally out of place and some times, too small to serve it purpose. It is worrisome, any time a trip to the cells is conducted, they depicts nothing less than inhumane conditions. Thus, there is the need to upgrade cells and put in place necessary things like phones, blankets, and functional toilet system with doors, blankets and many more.

Sierra Leone and Uganda

Good practices

Good information storage system: in Kibuye police station, there are computers on ground for the purpose of inventories in the police station
and case file storage. This information is saved in both soft and hard copies. The police station also have poster in place with illustrations that can be understood even by illiterates. There are billboards showing different information on security consciousness.

- Central police stations have toll free lines with an effective 24hrs customer service in place to respond to complains and distress calls. There are also patrol vehicles to respond to emergencies when necessary.
- Some stations even have counseling unity to respond to domestic violence.
- There are programmes on radio in which the public interact with police. There is adequate supply of water in mile Mile 91 police station. They also have in place, awareness campaign against crime and about crime.

What changes would the visitors like?

- Provision of patrol vehicles: the visitors found the patrol vehicles on ground ineffective nonfunctional, they there called for purchase of new vehicle to facilitate patrol and efficiency in police duty.
- Installation of office equipment: the tables and chairs the visitors found in the police stations they visited amazed them, they were all surprise to had found old chairs and tables whose place has become the museum in the police stations. Some of the chairs were those used in the 70s for students in the class rooms. They concluded by calling on appropriate authorities to correct the embarrassment.
- The buildings were also in a bad shape, some of them are dilapidating already, thereby putting both the police officers and their detainees at risk. The cell facilities were another thing that drew their attention. The cells were all virtually in a bad shape. They therefore called for it up grade.
- They also called for adequate funding of the police and the need to train them on regular basis.
- They called on the police to partner with private sectors to be able to purchase some of the things they wanted.
- Among other things are poor sanitization, training of police in ICT and the need for the police to be fair and accountable in their activities. Some visitors complained that some police stations withheld some information from them and did not allow them access to some places.
Country Reports
Reports of Results in Benin

Summary
In Benin Republic, 20 (twenty) police stations participated in the 2010 Altus police station visitors' week. All the police stations that participated were drawn from Cotonou, the country’s capital city. The visits were organized in partnership with the West Africa Network on Peace building (WANEP) with approval from the Ministry of Defence which has oversight responsibility over the police and the gendarmeries. Francophone countries have 2 main types of police organizations – the national police and gendarmeries. The visitors visited the different types of police organizations.

Sixty (60) visitors from different age groups, educational and professional backgrounds were involved in the visits. Drawing from the scores of the visitors the following stations were the top three:
1. Commissairat d'Abomey-Calavi (68.0),
2. Commissariat de Dantokpa (63.3)
3. Commissariat de Kpondehou (56.7)

- Zone five (Paynesville)

Who were the visitors?

The graphics below are the breakdown of the demographics of the participants:
Age

- Less than 20 years: 2%
- 20-30yrs: 19%
- 31-40yrs: 23%
- 41-50yrs: 21%
- Above 50yrs: 35%

Gender

- Female: 23%
- Male: 71%
The chart below represents the national assessment of the five indicator areas in Liberia.

The following charts are graphical representations of the performance of the participating police stations in Morovia.

**Community Orientation**

On community orientation, the visitor scored Johnsonville police station 71% to emerge in the first position. Zone 1 Depot 2 police station came second with 65% while Zone five (Paynesville) with 59% came third.
Physical Conditions

With regards to physical conditions, the visitors scored Johnsonville police station 62% to emerge in the first position. Zone 1 Depot 2 police station came second with 60% while Liberia National police station with 51.7% came third.

Equal Treatment of the Public without bias to gender, sexual orientation etc

With regards to equal treatment of public, Zone 1 Depot 2 police station scored 57% to clutch the first position on detention conditions, followed by Johnsonville police station with 53% in second position and the third position by Zone 2 Depot 1 police station police station with 51%.

77
On Transparency and accountability, the visitors scored Johnsonville police station 66% to emerge in the first position. Zone 1 Depot 2 police station came second with 63% while Zone five (Paynesville) with 61% came third.

On Detention conditions, the visitors scored Johnsonville police station 68% to emerge in the first position. Zone 1 Depot 2 police station came second with 67% while Zone 1 Depot 2 with 46% came third.
Overall scores

The overall scores have Johnsonville police station as first with 64%, Zone 1 Depot 2 second with 62.4% as second and Zone Five (Paynesville) as third with 48.8%.
Report of Results in Nigeria

Summary

Nigeria is the most populous country in Africa. It has 36 states and the Federal Capital Territory, Abuja. It is located in West Africa and shares land borders with the Republic of Benin in the West, Chad and Cameroon in the East and Niger in the North.

Nigeria has only one formal police organization recognized by the Constitution of the Federal Republic of Nigeria 1990, the Nigeria Police Force. A total of 135 (one hundred and thirty-five) police stations participated in the 2010 Altus police station visitors’ week. All the police stations that participated were drawn from Akwa Ibom, Abuja, Imo, Lagos and Oyo. The visits were organized by CLEEN Foundation in collaboration with other civil society organizations such as the Network on Police Reform in Nigeria (NOPRIN), the Project Alert on Violence Against Women, Women’s Rights Advancement and Protections (WRAPA), Transition Monitoring Group, Community Policing Partnership Forum, Abak, government agencies such as the Ministry of Police Affairs and the National Human Rights Commission.

Four hundred and thirty-five (436) citizens of Nigeria participated in the exercise from different age groups, states, educational social status and professional backgrounds were involved in the visits.

Which police stations participated?

One hundred and thirty-five (135) police stations participated in the exercise. They are as follows:
